

## POWER AMPLIFIER MODULE ASSEMBLY

## ABSTRACT OF THE DISCLOSURE

A power amplifier module assembly (100) includes a PA module (102) having  
5 a flange (104) and a mounting bracket (106) coupled thereto. A thermally conductive  
pad (108) having an electrically conductive surface (110) that couples to the mounting  
bracket (106) and the flange (104) via a chassis (204) so as to provide both shielding  
and thermal dissipation to the PA module (102).
